

**YOUR #1 CHOICE FOR COMPRESSED GAS CYLINDER COMPONENTS**

American Cap Company is the world's leading manufacturer of compressed gas cylinder components. Since 1988, we have provided cylinder caps, collars, flanges, foot rings, lids, neck rings and other components to insure the safety of Industrial, LPG, CNG and Specialized Gas cylinders. We take pride in serving our customers worldwide.

**BAYONET CAP**

**PRODUCT USE**

The Bayonet style cylinder cap was designed to accommodate oversize valves that would not or could not be protected by any standard size cylinder caps. The Bayonet cylinder cap is used in conjunction with an adapter ring that mates with the corresponding neck ring threads of the cylinder. The oversized thread of the Bayonet cap provides the extra valve clearance and an increased measure of safety for the valve.

**KEY FEATURES:**

- Durable steel design
- Meets ISO 11117, CSA B340, CGA V-9, and DOT 49 CFR Standards

**OPTIONS:**

- Caps can be custom lettered
- Drain hole
- Cap comes with 1" diameter vent holes, and 5/16" diameter tag holes
- Available with or without vent holes
- Zinc plating - yellow or clear
- This product can be powder coated to any custom color upon request of the customer
