

YOUR #1 CHOICE FOR COMPRESSED GAS CYLINDER COMPONENTS

American Cap Company is the world's leading manufacturer of compressed gas cylinder components. Since 1988, we have provided cylinder caps, collars, flanges, foot rings, lids, neck rings and other components to insure the safety of Industrial, LPG, CNG and Specialized Gas cylinders. We take pride in serving our customers worldwide.

CYLINDER SLEEVE

PRODUCT USE

Cylinder Sleeves afford the owner of a cylinder the ability to identify ownership of the cylinder. When cylinders change ownership very often the neck ring will have the previous owner identified. To replace the neck ring, the process can prove costly and time consuming. The Cylinder Sleeve is placed over the existing neck ring with the identifying label of the new owner and it is easily affixed by an adhesive. Whether you are placing your name on a new cylinder or previously owned cylinder, the Cylinder Sleeve will identify the current owner.

KEY FEATURES:

- Embossed lettering
- Designed for standard 3-1/8 - 11 thread neck ring
- Easy to apply with supplied adhesive (one tube for every 20 sleeves)
- Zinc plated

OPTIONS:

- American Cap Company's Cylinder Sleeve is available plain or powder coated
- Can provide bore for larger thread sizes (i.e. 3-1/2)
