

YOUR #1 CHOICE FOR COMPRESSED GAS CYLINDER COMPONENTS

American Cap Company is the world's leading manufacturer of compressed gas cylinder components. Since 1988, we have provided cylinder caps, collars, flanges, foot rings, lids, neck rings and other components to insure the safety of Industrial, LPG, CNG and Specialized Gas cylinders. We take pride in serving our customers worldwide.

SAFETY SNAP CAP

Custom Sizes Available

PRODUCT USE

Safety and security are hallmarks of the products we produce. The Safety Snap Cap was designed for safety and valve access security. This design affords easy access to the valve handle without having to remove the protective cap and replacing the regulators each time access to the cylinder is needed. This cap provides safety and security for the valve with the regulator attached. Once the cap is mounted to the cylinder and the regulator is attached, unauthorized access to the valve handle can be achieved by locking the cap into position. For day-to-day usage of the cylinder, the lock is removed and the cap is opened for access to the valve handle.

KEY FEATURES:

- Limits unauthorized access to valve
- Anti-theft feature
- Available for high pressure (oxygen) and low pressure (acetylene) cylinders
- Meets ISO 11117, DOT 49 CFR, CSA B340, and CGA V-9 Standards

OPTIONS:

- The Safety Snap Cap comes with a standard powder coated finish of safety yellow, but we also offer any custom color
- The Snap Cap can also be lettered for identification purposes
- Keyed alike - minimum order
