PRODUCT USE

Our lid design has proven itself in the field. The lid accommodates American Cap's standard 15-1/2" collar. Together the lid and collar combination have provided safety and protection from nature and the outside environment to suppliers of propane, LPG, and natural gas. This combination provides easy access to the valve for filling and hookup as required.

KEY FEATURES:

- Manufactured from durable steel
- Allows easy access to the valve
- Protects the valve from damage
- Can be secured to prevent tampering or theft

OPTIONS:

- Available in custom powder coat colors
- Galvanizing available
- Lids are available in custom diameters and hinge configurations
